

Executive Notes

Your Provincial Executive Council met on **June 11 and 12** in St. John's. This edition of Executive Notes is designed to provide you with a summary of major decisions and discussions that occurred at this meeting. For further information on any of these issues please contact any member of [Provincial Executive](#) or the NLTA staff person as indicated.

Current Topics

The following items were discussed under current topics: **quality of work life, teacher allocations, and responding to the membership.**

The Collective Agreement specifies that a joint committee be set up between government and NLTA to study workload (Schedule P). A major challenge has been to reach agreement on the possible parameters of such a study. There has been some consensus on areas that both sides would like to study; however, several areas that NLTA wants to study have met with disagreement from government as they argue that the areas are difficult to quantify. These and other areas, however, are still under discussion. There have also been discussions with other teachers' associations regarding previous studies of quality of work life.

The issue of **teacher allocations** was again discussed at length at this Executive meeting. The President has been trying to get an indication from government as to where we are with this issue. The Minister of Education has made a public commitment to put teachers back but no specifics have been forthcoming. The point has been made perfectly clear that NLTA was most effective working behind the scenes on this issue of teacher allocations and that once parents took up the cause, things happened. Although the commitment has been made, the lack of specific information means that many teachers are finding it difficult to make plans for next year. Knowing the allocation would be helpful and much less stressful for administrators and teachers.

The main issue for discussion under **responding to the membership** was province-wide voting. As per the directive of Convention a poll will take place to determine the views of the membership on this issue. To date the following action has been planned:

- A select committee will be formed from within Provincial Executive Council. The committee will be chaired by a Table Officer, as selected by the President, and will consist of two other Executive members and an administrative staff member.
- The committee will report to Table Officers and subsequently Executive prior to the November Joint Council meeting.
- The committee will have as its mandate the issue of province-wide voting/elections for the offices of President and Vice-President as per the direction of Resolution FL11 as it relates to By-Law XII. Resolutions 11, 12, and 13 from the Floor of BGM 1999 will guide the thinking of the committee. These resolutions are as follows:

FL11. That the NLTA conduct a poll of the full membership during the 1999-2000 school year on

the defeated proposed By-Law XII change regarding a province-wide vote. **[Carried]**

FL12. That prior to holding of the poll, the NLTA distribute an information package to each school.

This package will contain the positions of both the NLTA and the proponents of province-wide voting. **[Referred to Executive]**

FL13. That prior to the holding of the poll, but after the distribution of an information package, the NLTA arrange to hold a forum to debate the issue of a province-wide vote in the most efficient and cost-efficient means possible (eg. community cable, TIC, Bulletin, etc.). **[Referred to Executive]**

Pathways to Programming and Graduation

This issue is far from settled but there have been continued discussions with the Department of Education and the new Assistant Deputy Minister, Harold Press. One frustration with the issue has been the inconsistency of people dealing with the issue from government. It appears, however, that after a series of recent meetings the Department is willing to continue discussions and problem solve to determine how best to implement **Pathways** to the benefit of teachers and students..

There are four main areas of concern expressed by teachers about **Pathways**. These are **implementation, documentation, inservice, and remedial**. Concerns have been raised about legalities and liabilities which have to be clarified as soon as possible.

NLTA is opposed to the implementation of **Pathways** -- not to the document. It appears the School Districts have established time frames that are earlier than the proposed three year time frame for implementation. There was general agreement that these issues needed clarification and to be addressed immediately.

Teacher Certification

The Ad Hoc Committee on Teacher Certification presented a report to Executive on consultations with teachers re. the teacher certification proposal. The following recommendations were approved by Executive:

1. Considering the consistency of responses and the representation during the consultative process, that the summary report be adopted and considered to be sufficient, i.e. that there be no further consultation at this point.
2. The President and Executive Director will continue discussions with the Minister of Education and the Dean of the Faculty of Education, Memorial University to determine their willingness to pursue this new direction for teacher certification.
3. If the parties agree to pursue this, then they should delineate a process whereby such change can be moved forward.

Having completed its mandate the current Ad Hoc Committee on Teacher Certification was dissolved and a new committee will be formed as soon as possible.
